MAGNET WIRE FACTORY

We made it BY

DOUBLE

COPPER & ALUMINUM

ALFANAR MAGNET WIRE FACTORY warmly celebrates the success of adding 2 new Italian-made enameling machines which have the latest modern technology.

To brief you more, our newly commissioned enameling plants are now capable of meeting any OEM's demand of a qualified product by adding two extra machines with capacity of 400 M/T tons per month of enameled round Copper & Aluminum wire. The newly commissioned PLC-controlled high speed catalytic enameling plants ensure consistency in insulation in terms of electrical, thermal, mechanical and chemical properties as per stringent international standards.

NEW MACHINE'S PRODUCTS CATEGORIES:

#Galileo V70-224 produced:

CU. Round wire from 0.65-2.24mm
AL. round wire from 0.70-2.50mm

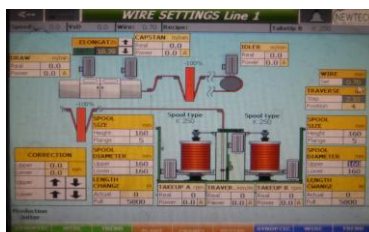

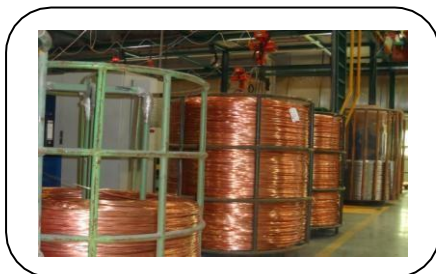

#Galileo V250-500 produced:

CU. Round wire from 2.00-5.00mm
AL. round wire from 2.24-5.50mm

*All products comply with IEC standards

To enhance the quality of the product, an on-line continuity tester by Lear, USA-made, is built-in enabling the continuous monitor of the enamel coating quality. Extremely rigorous quality checks for various parameters as per different international standards are routinely carried out to ensure excellence in quality.
